Radiance for Performance Horses

Maintaining adequate fuel supplies to support a desired level of performance is a difficult challenge in the feeding of performance horses.

Research has shown that supplemental fat will supply concentrated energy that can be safely consumed by horses as the energy density of the diet is increased. Performance is enhanced by sparing muscle glycogen, maintaining more constant glucose concentrations, decreasing thermal stress, improving aerobic and anaerobic performance and delaying fatigue.

Radiance is also an excellent weight building supplement for horses that are "hard keepers".

Guaranteed Analysis

Crude Protein, (Min.)	17.00%
Crude Fat, (Min.).....	40.00%
Crude Fiber, (Max.).....	18.00%
Vitamin E, (Min.)	800 IU/lb

Ingredients

Milled Flaxseed, Distillers Dried Grains with Solubles, Vegetable Oil (partially hydrogenated preserved with mixed tocopherols), Milled Chia Seed, Yeast Culture, Vitamin E, L-Lysine HCL, Sodium Chloride (Salt), Calcium Carbonate

REV: 05/05/20

Net Weight: 25.00 lbs (11.34 kg)

Feeding Directions

For a healthy and glossy coat: Feed one (1) to two (2) scoops (two to four ounces) daily with regular grain ration.

For weight gain: Feed two (2) to four (4) scoops (four to eight ounces) daily with regular grain ration.

For performance, or working horses: Feed Radiance at a rate of two (2) to five (5) scoops (four to ten ounces) daily with regular grain ration.

Radiance may be fed at higher rates for horses involved in intense training or work.--contact HorseTech for additional feeding suggestions.

The enclosed scoop will hold approximately two (2) ounces when filled to the 1/2 cup line. Radiance contains added calcium to help maintain the proper calcium to phosphorus ratio.
